## **LETTER OF RECOMMENDATION**

To whom it may concern

I write this letter of recommendation on the basis of my gratitude, authentic observations and engagement with Mr. Lakshit Jain. He engaged with us on 'website design and upgradation' project as part of the Practice School Program organized in collaboration with his institute BITS PILANI. This project was focused on redesigning and upgrading Prakriti Organics website. Apart from technical expertise on coding and web-designing, this project demanded research skills, rigor, perseverance, individual level study, design thinking, team work and communication.

Lakshit learns very rapidly, plans and organizes his tasks systematically, communicates his ideas with precision, takes up responsibilities and is open to creative ideas & feedback. Although some part of the context and domain was not directly related to his studies, he quickly comprehended the domain knowledge and shared his ideas spontaneously. He assessed the content available with us and gave us multiple options for the website layout and design. Once, we finalized the layout, he was able to visualize the sub-tasks on his own. He always had a list of objectives, research inputs and sub-tasks handy in his notebook and google doc. He helped us plan & execute the entire work on google meet, google docs, sheets, drives, PowerPoint, etc. He had a great rapport with his team member and both of them helped us complete the project on time.

We had a fruitful experience with Lakshit. He is not just good with technicalities but also highly compatible due to his personal & professional attributes. Lakshit's work will definitely help us systematically showcase our work to more stakeholders. He has worked with his team member to create a reference document & video for upcoming interns so that they understand the way designing and coding has been done, specific codes, and contribute easily to further upgradation of the website.

We wish him all the best for his future endeavors.

Rovin Pushp

Coordinator-Internship
